FORWARD-LOOKING STATEMENTS

The Company's assumptions and financial projections in this supplemental package are based upon "forward-looking" information and are being made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are inherently subject to known and unknown risks and uncertainties, many of which the Company cannot predict, including, without limitation: changes in general economic conditions; the extent of customer defaults or of any early lease terminations; the Company's ability to lease or re-lease space at current or anticipated rents; the availability of financing; the failure to maintain credit ratings with rating agencies; changes in the supply of and demand for industrial/warehouse properties; increases in interest rate levels; increases in operating costs; natural disasters, terrorism, riots and acts of war, and the Company's ability to obtain adequate insurance; changes in governmental regulation, tax rates and similar matters; and other risks associated with the development and acquisition of properties, including risks that development projects may not be completed on schedule, development or operating costs may be greater than anticipated or acquisitions may not close as scheduled. Although the Company believes the expectations reflected in the forward-looking statements are based upon reasonable assumptions at the time made, the Company can give no assurance that such expectations will be achieved. The Company assumes no obligation whatsoever to publicly update or revise any forward-looking statements. See also the information contained in the Company's reports filed or to be filed from time to time with the Securities and Exchange Commission pursuant to the Securities Exchange Act of 1934, as amended.

ISSUER RATINGS ⁽¹⁾

	Issuer Rating	Outlook
Fitch Ratings	BBB	Stable
Moody's Investors Service	Baa2	Stable

⁽¹⁾ A security rating is not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time by the assigning rating agency.

Listed below are definitions of commonly used real estate investment trust (REIT) industry terms. For additional information on REITs, please see the National Association of Real Estate Investment Trusts (NAREIT) web site at www.nareit.com.

Real Estate Investment Trust: A company that owns and, in most cases, operates income-producing real estate such as apartments, shopping centers, offices, hotels and warehouses. Some REITs also engage in financing real estate. The shares of most REITs are freely traded, usually on a major stock exchange.

To qualify as a REIT, a company must distribute at least 90 percent of its taxable income to its stockholders annually. A company that qualifies as a REIT is permitted to deduct dividends paid to its stockholders from its corporate taxable income. As a result, most REITs remit at least 100 percent of their taxable income to their stockholders and therefore owe no corporate federal income tax. Taxes are paid by stockholders on the dividends received. Most states honor this federal treatment and also do not require REITs to pay state income tax.

Industrial Properties: Generally consisting of four concrete walls tilted up on a slab of concrete. An internal office component is then added. Business uses include warehousing, distribution, light manufacturing and assembly, research and development, showroom, office, or a combination of some or all of the aforementioned.

Property Net Operating Income (PNOI): *Income from real estate operations less Expenses from real estate operations* (including market-based internal management fee expense) plus the Company's share of income and property operating expenses from its less-than-wholly-owned real estate investments.

EBITDA: Earnings, defined as Net Income excluding gains on sales of depreciable real estate property, before interest, taxes, depreciation and amortization.

Debt-to-EBITDA Ratio: A ratio calculated by dividing a company's debt by its EBITDA.

Adjusted Debt-to-Adjusted EBITDA Ratio: A ratio calculated by dividing a company's adjusted debt by its adjusted EBITDA. Debt is adjusted by subtracting the cost of developments in lease-up or under construction. EBITDA is adjusted by adding an estimate of NOI for significant acquisitions as if the acquired properties were owned for the entire period, and by subtracting NOI from developments in lease-up or under construction and from properties sold during the period.

Funds From Operations (FFO): FFO is the most commonly accepted reporting measure of a REIT's operating performance, and the Company computes FFO in accordance with standards established by NAREIT. It is equal to a REIT's net income (loss) attributable to common stockholders computed in accordance with generally accepted accounting principles, excluding gains or losses from sales of depreciable real estate property and impairment losses, plus real estate related depreciation and amortization, and after adjustments for unconsolidated partnerships and joint ventures.

Total Return: A stock's dividend income plus capital appreciation over a specified period as a percentage of the stock price at the beginning of the period.

Straight-Lining: The process of averaging the customer's rent payments over the life of the lease. Generally accepted accounting principles require real estate companies to "straight-line" rents.

Debt-to-Total Market Capitalization Ratio: A ratio calculated by dividing a company's debt by the total amount of a company's equity (at market value) and debt.

Percentage Leased: The percentage of total leasable square footage for which there is a signed lease, including month-to-month leases, as of the close of the reporting period. Space is considered leased upon execution of the lease.

Percentage Occupied: The percentage of total leasable square footage for which the lease term has commenced as of the close of the reporting period.

Same Properties: Operating properties owned during the entire current period and prior year reporting period. Development properties are excluded until stabilized for both the current and prior year reporting periods.

Rental changes on new and renewal leases (before straight-line rents): Rental changes are calculated as the difference, weighted by square feet, of the annualized base rent due the first month of the new customer's term and the annualized base rent of the rent due the last month of the former customer's term. If free rent is given, then the first positive full rent value is used. Rental amounts exclude base stop amounts, holdover rent, and premium or discounted rent amounts. This calculation excludes leases with terms less than 12 months, as well as first generation space acquired or developed by EastGroup Properties.

Leases Expiring and Renewal Leases Signed of Expiring Square Feet: Includes renewals during the period with terms commencing during the period and after the end of the period.
