JACKSON, MISSISSIPPI, July 20, 2016 - EastGroup Properties, Inc. (NYSE: EGP) announced today the results of its operations for the three and six months ended June 30, 2016.

Commenting on EastGroup's performance, Marshall Loeb, CEO, stated, "We are pleased with the solid second quarter results. Our 7.6% increase in quarterly FFO per share means that we've now achieved FFO per share increases in 20 of the past 21 quarters. This long term FFO growth is being driven by consistently high occupancy allowing us to continue raising rents. Our strategy is simple and straightforward and it is working.

"Outside of our day-to-day operations, we're proud of the progress made recycling capital. Selling older, non-core Houston assets creates further geographic diversification within our portfolio while generating funds for our higher yielding development pipeline. Finally, we further strengthened our balance sheet by issuing \$30 million of equity during second quarter."

DEFINITIONS

The Company's chief decision makers use two primary measures of operating results in making decisions: (1) property net operating income (PNOI), defined as *Income from real estate operations less Expenses from real estate operations* (including market-based internal management fee expense) plus the Company's share of income and property operating expenses from its less-than-wholly-owned real estate investments, and (2) funds from operations attributable to common stockholders (FFO). EastGroup defines FFO consistent with the National Association of Real Estate Investment Trusts' definition, as net income (loss) attributable to common stockholders computed in accordance with U.S. generally accepted accounting principles (GAAP), excluding gains or losses from sales of depreciable real estate property and impairment losses, plus real estate related depreciation and amortization, and after adjustments for unconsolidated partnerships and joint ventures.

-MORE-

PNOI and FFO are supplemental industry reporting measurements used to evaluate the performance of the Company's investments in real estate assets and its operating results. The Company believes that the exclusion of depreciation and amortization in the industry's calculations of PNOI and FFO provides supplemental indicators of the properties' performance since real estate values have historically risen or fallen with market conditions. PNOI and FFO as calculated by the Company may not be comparable to similarly titled but differently calculated measures for other REITs. Investors should be aware that items excluded from or added back to FFO are significant components in understanding and assessing the Company's financial performance.

The Company's chief decision makers also use earnings before interest, taxes, depreciation and amortization (EBITDA) in making decisions. EBITDA is defined as Net Income, excluding gains or losses from sales of depreciable real estate property, plus interest, taxes, depreciation and amortization.
